organized and operated by

Following the success of the 1st **International Urban Mobility Dialogue**, academus is proud to open the next round for those of you, who are interested in shaping future mobility strategies in our growing smart world.

The **2nd International Smart City Dialogue on Urban Mobility** is scheduled for the 13th – 16th of November 2019 and will be held again in the capital of Germany under the patronage of **Berlin authorities**.

We stay dedicated to our **mission** and create a special platform for G2G, G2B and academic discussions with highest practical outcome for each single participant. Therefore we aim to welcome the representatives of all mobility communities, formed by real decision-makers from different city and state governments of the world and along with them - true mobility innovators, working for business, industries, academia and research, as well as public enterprises.

The **Urban Mobility Dialogue** is a boutique event with high-level audience of approx. 300 people – those influential visionaries and thought-leaders in urban mobility, who can make a marked improvement on the quality of life in urban environments. The constellation of the

2nd International Urban Mobility Dialogue

13th – 16th of November 2019 | Berlin, Germany

represented cities will become the golden section of our event. We prepare to welcome at least 12 official delegations from almost all parts of the world. Our choice of invited cities will be far not random. We preselect the cities by their interest in smart transformations, as well as by criteria of unique stories of success and mobility challenges, being raised from their side. This is another guarantee of ours on intensive and saturated discussions within the event, uncommon approaches to the topics and unexpected results. And this is how we try to reduce or fulfill any existing or potential gaps between state and business, public and private activists, so that their visions and decisions get aligned in their places and globally.

The special dialogue format will make our participants enjoy all the 4 days of the official program. The first day will consist of already traditional **“Parade of Cities”**, meaning each city to be presented by its delegation, continued by networking buffet, round tables and further on - by special guest lecture and prosecco reception. The next days will be filled with numerous keynote speeches, discussion sessions and panel meetings. We expect each participant’s valuable impact towards all the variety of smart mobility topics: **e-mobility and autonomous driving (including infrastructure), parking, public transport, Mobility as a service, commuting and congestions, traffic management, IoT and block chain technologies in the transport and logistics, freight distribution and last mile solutions, investment projects and much more.**

In addition, the participants will get inspired by the disruptive ideas within the **start-up show**, have a look and even test some vehicles at our cosy exhibition space as well as join an inner-city boat trip or an excursion and the official dinner on the second evening of the **UMD**. We hope our guests to enjoy the atmosphere of fruitful solidarity and understand the no more unusual term of **UMD family**.

2nd International Urban Mobility Dialogue

13th – 16th of November 2019 | Berlin, Germany

We are proud to work with a **number of outstanding partners** to make this event happen. The Dialogue is actively supported by the **Berlin Authorities, graphmasters, Leitner, FIWARE, OASC, ppp, Zentrum Technik und Gesellschaft of TU Berlin, Polis Network, Transport Growth Initiative (Nigeria), InfraMobility, phi360** and many others.

Known, that our concept ensures the most active participation for almost all our guests, it's only needed from your side to choose the preferable format of attending the **International Urban Mobility Dialogue** - as a participant, expert or sponsor.
